Beyond Biden — Rebuilding the America We Love

Best-selling author Newt Gingrich exposes the anti-American forces that have grown so large and so aggressive in their quest for power in Joe Biden's America.

Too many Americans are depressed and in despair about our nation's future.

President Biden has emboldened left-wing radicals to demand the government impose profoundly destructive values and ideas on Americans.

In *Beyond Biden*, Gingrich explains how the struggle between the defenders of American exceptionalism and the forces of anti-Americanism is reaching a fever pitch. These forces have grown so large, so well-financed, so entrenched and aggressive that they must be studied closely and understood completely.

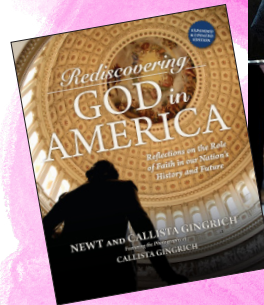

Gingrich argues conservatives should be optimistic. After observing Joe Biden and Kamala Harris' first year in the White House, the former House Speaker is convinced the 2020 election was a detour — and not a turning point for our country.

"Beyond Biden is a fantastic book. Newt Gingrich brilliantly outlines the roadmap for building upon supermajority issues that will move our country forward." —President Donald J. Trump

Rediscovering God in America

by Speaker Newt Gingrich and Ambassador Callista L. Gingrich

You will see how faith in God is literally carved into the stone of these monuments, just as it is embedded in our nation's founding principles. But this is not simply a walking tour of the city. THANK YOU!

Thank you for your generous support of this event that will benefit scholarships to worthy students and veterans at Ave Maria School of Law. Tom Monaghan's vision to create a law school of the highest academic caliber, with a unique and close fidelity to the teachings of the Catholic Church and Natural Law has not only taken root but continues to thrive.

At a time when our nation most needs it, we continue to educate lawyers that believe that the practice of law is a vocation—a calling from God. Tom's dream of graduating men and women who would go out into the world and serve as change-agents for the good of humankind has been realized.
